## Personal Profile

As a motivated and enthusiastic junior developer, I'm excited to bring my skills and passion for coding to a dynamic team. I'm eager to learn, grow, and contribute to innovative projects that make a real impact.

## About Me

I'm a junior web and app developer with a solid foundation in programming languages, including HTML/CSS, JavaScript, React/Native and Java. I'm a quick learner, a team player, and a creative problem solver.

## What Drives Me

- Building intuitive and user-friendly applications and websites
- Learning from experienced developers and expanding my skill set
- Collaborating with others to achieve common goals
- Staying up to date with the latest industry trends and technologies

## Career Goals

I'm looking for a junior developer role where I can apply my skills, learn from others, and contribute to exciting projects. I'm excited to grow professionally, develop my expertise, and become a valuable member of a development team.

## Skills

- JavaScript
- React
- Git
- HTML5

- CSS3
- Grid/Flexbox
- Java

## Education

### **Rocklands Secondary School**

2013-2017

### **CTI**

2018

### **Eduvos**

2019-2021

## Qualifications

- National senior Certificate
- Higher Certificate in Information Technology (Information Systems)
- Bachelor of Science in Information Technology

## Experience

### **Tertiary Experience**

I currently do not have experience working in a professional environment. The experience I have is working in a learning environment working alone as well as in a group to complete software projects.

## Personal Projects

### **Wedding Website**

Visit website here:

<https://lulamacele.github.io/perfect-weddings/#/>

- Converted this project from HTML file into a React app.
- The site mainly contains details on wedding services they provide and a form to for users to send an email for general queries.
- The form utilises EmailJS to send predefined emails.

## **Movies App**

Download app here:

[https://expo.dev/accounts/lulama/projects/movie\\_app/builds/2dfe7ba3-3fb8-49db-97dd-6b2cc70011ab](https://expo.dev/accounts/lulama/projects/movie_app/builds/2dfe7ba3-3fb8-49db-97dd-6b2cc70011ab)

- Built using Expo and React-Native.
- Consumes The Movie Database (TMDB) API to display movies with their details and posters.
- Users can search for movies using any movie title.

## **Barber Appointment Booking App**

Download app here:

<https://expo.dev/accounts/lulama/projects/TheBarber/builds/2df017e9-c5c4-4fcd-a9b2-710dcf11c39c>

- Built using React-Native and Expo
- For data storage I used firebase firestore and for authentication I used firebase authentication.
- Users can create an account, login, and logout.
- For the calendar and agenda features I used react-native-calendars.
- For admin users the app has CRUD (create, read, update, delete) functionalities to manipulate the services offered by the barber.
- As for users they can book appointments for a certain date and time selecting a service they want from the barber.
